SUMMARY

Experienced Full Stack Web Developer proficient in MERN stack technologies such as JavaScript, Node.js, Express.js, and React.js. Skilled in creating efficient server-side APIs and developing responsive frontend web applications. Strong problem-solving and communication skills with a proven ability to collaborate effectively with cross-functional teams. Proactive learner, staying updated with the latest web development trends for continuous improvement.

SKILLS AND ABILITIES

Languages	: HTML, CSS, JavaScript, C++
Frameworks/Libraries	: React.Js, Node.Js, Express.Js
Database/Tools	: MongoDB, GitHub, Git, Postman, Figma, Vercel
Soft Skills	: Problem Solving, Effective Communication, Attention to Detail, Teamwork

WORK EXPERIENCE

MERN Stack Developer Intern   Jan 2024 - present

Participated in Agile development methodologies, attending meetings and actively contributing to sprint planning and discussions. Assisted in the design and development of RESTful APIs to facilitate seamless communication between the front-end and back-end components. Documented code changes and technical specifications, ensuring clarity and maintainability of the codebase.

PROJECTS

AS Fashion Factory

Created a robust e-commerce website with an intuitive admin panel for efficient product, order, and user management. Enhanced user experience with advanced filtering and sorting options on the product page. Integrated a user-friendly cart page for easy item management before checkout. Ensured secure payment processing with support for multiple payment methods. Employed responsive design for compatibility across various devices, optimizing user accessibility.

Cybrom Complain Management System

Designed and implemented authentication and authorization features for student and admin roles within a complaint management system. Key features include user authentication workflows, role-based access controls. Leveraged React.js for a dynamic frontend, integrated Redux Toolkit for efficient state management and employed Node.js/Express.js for scalable backend simulation.

Student Record Management System

Led development of a robust CRUD app using the MERN stack (MongoDB, Express.js, React.js, Node.js). Key features include seamless CRUD operations, robust user authentication, dynamic React.js frontend, and scalable Node.js backend, showcasing full-stack proficiency and user-centric design.
